AMENDMENT AFTER FINAL ACTION

Sir:

In response to the final Action of October 21, 2002, please amend the application, as follows:

IN THE CLAIMS

Please amend claims 1, 4-6, 9 and 10, as follows:

1.(twice amended) A body mounting display system, comprising:

a display device to be worn by a user and having at least one interface;

a computer situated away from the display device and having a bus line for outputting signals corresponding to at least display data; and

a radio transmission device disposed between the display device and the computer, and including a computer side output transmission circuit connected to the computer through the bus line, and a body side output transmission circuit connected to the display device through the at least one interface so that the signals at the computer passing through the bus line are transmitted to the display device by wireless as they are, and are processed at a user side to be displayed at the display device through the at least one interface.
